

DIMENSION SHEET - VAN CONVERSION ROOFS

If the van has an added "roof conversion" additional measurements will be needed for the custom cover. Note the diagrams below. All **length measurements** are taken on a straight horizontal line and do **NOT** follow any slopes. All **height measurements** are taken on a straight vertical line and are taken from the rain gutter. The rain gutter is also used for the length measurements from the rear to the front of the van. If the roof shape differs from these drawings, please alter the drawing accordingly. A profile photo of the van will help in the design of a proper fitting cover. The photo can be returned if you wish.
